

R Notebook for Assignment 1

Research Interest

My PhD research emphasizes on the study of visual-spatial attention appears distributed across **3D space**. This remains a large gap in the literature as most psychophysical experiments have focused predominantly in 2D space and how attention appears allocated strictly across the x- and y-axes—thereby neglecting the **z-axis**. My projects have attacked in this issue in *virtual space* using VR technology.

Favorites

Favorite Music

1. Fireflies - Owl City
2. Burn it to the ground - Nickelback
3. Wagonwheel - Darius Rucker
4. Days that end in why - Morgan Wallen
5. Ready or not - Bridgit Mendler

Favorite Equation

$$E = mc^2$$

Favorite Artists

Name	Achievements
Leonardo Da Vinci	Mona Lisa
Vincent Van Gogh	Starry Night
Pablo Picasso	Known for founding the Cubist Movement
Claude Monet	Founded 'impressionism'
Edvard Munch	The Scream

A Chunk of Code

```
{r} print('This is the result of a chunk of code')
